

Rowan Renaissance drillship arrives in Namibia

Mar 5th, 2014

Tower Resources plc, the AIM listed Africa focused oil and gas exploration company, has confirmed that the Rowan Renaissance drillship arrived, as expected, in Walvis Bay, Namibia, yesterday.

This new build drillship will now undergo the scheduled preparation and final acceptance testing by Repsol, to whom it is being hired on a three year contract.

It is still expected to start its operations for the [Welwitschia-1 well](#), operated by Repsol and in which Tower has a 30% interest, on or around 11 April, with the spud being approximately one week later.

The Rowan Renaissance is a new build, dual-stack, 6th generation drillship, constructed in the Ulsan shipyard, South Korea, by Hyundai Heavy Industries and is on a three year, international, multi-well contract with Repsol.
